5. Most of the data are on the right, and the tail extends to the left. So, the distribution is skewed left.

6. The left side of the graph is approximately a mirror image of the right side of the graph. So, the distribution is symmetric.

7. Most of the data are on the left, and the tail extends to the right. So, the distribution is skewed right.

8. Most of the data are on the right, and the tail extends to the left. So, the distribution is skewed left.
